

Ammar I Marvi

+1 (951) 217-5081 | amarvi@fas.harvard.edu | aimarvi.github.io

EDUCATION

Harvard University <i>Ph.D. in Psychology</i>	2025 – Cambridge, MA
Massachusetts Institute of Technology <i>Advanced Study Program</i>	2023 – 2025 Cambridge, MA
University of California, Los Angeles <i>B.S. in Neuroscience, minor in Statistics & Data Science, Arabic & Islamic Studies</i>	2023 Los Angeles, CA

EXPERIENCE

Harvard University <i>Adv: Talia Konkle</i> Visual perception and cognition in intelligent systems.	2025 – Cambridge, MA
Massachusetts Institute of Technology <i>Adv: Nancy G Kanwisher</i> Studying the functional landscape of the human brain.	2023 – 2025 Cambridge, MA
University of California, Los Angeles <i>Adv: Alcino J Silva</i> Learning and memory deficits in mouse models of Noonan's Syndrome.	2021 – 2023 Los Angeles, CA
Cedars-Sinai Medical Center <i>Adv: Josh Burda</i> - Molecular and cellular regulation of regenerative synaptic circuit remodeling after traumatic CNS injury. <i>Adv: Akil Merchant</i> - Studying diffuse large B-cell lymphomas and associated Hedgehog signaling in blood cancer patients.	2020 Los Angeles, CA

PUBLICATIONS

Papers

- Xu, R., ..., Marvi, A.I., ..., Richardson, M. (2024) **Monosynaptic connections link functionally similar regions in human cortex.** *bioRxiv*
- Marvi, A.I., Prince, J.S., Kay, K. (2026) **Integrating neuroscience across species and scales.** *Nature Neuroscience*
- Marvi, A.I.[†], Hutchinson, S.[†], Fedorenko, E., Saxe, R.R., Kamps, F.S., Regev, T.I., Chen, E.M., Kanwisher, N.G. (2025) **An efficient multifunction fMRI localizer for high-level visual, auditory, & cognitive regions in humans.** *Imaging Neuroscience*
- Marvi, A.I., Kanwisher, N.G., Khosla, M. (2025) **Sparse components distinguish visual pathways & their alignment to neural networks.** *ICLR*

Posters

- Marvi, A.I., Prince, J.S., Alvarez, G.A., Konkle, T. (2026) **Temporal dynamics of IT representations depend on image-manifold scale.** *Vision Sciences Society*
- Marvi, A.I.[†], Zhuang, C.[†], Dobs, K.[‡], Kanwisher, N.G.[‡] (2024) **A single computational objective may not be sufficient for human-like face discrimination.** *Conference on Cognitive Computational Neuroscience*

AWARDS

Spotlight distinction <i>The Thirteenth International Conference on Learning Representations (ICLR)</i>	2025 Singapore
